

Managed IT Services

We combine a focus on business outcomes with a cost effective approach to providing everyday operations support and strategic IT innovation.

Trust Corserve to Manage Your IT

Let Corserve manage the hardware, software, networks and security protection that you need to effectively run your business everyday. Our services encompass servers, storage, virtualization, networking, cloud, collaboration, mobility, and more. We'll perform asset management. We'll manage your security, backup and disaster recovery. We'll find the best ways to keep you connected with your customers.

BENEFITS

Improve Every Part of Your IT

Corserve starts by working with you to define the right IT strategy for your business. From there, we'll design a solid and flexible architecture, and implement the products and services that will be components of that architecture. We'll monitor your operations day and night to make sure it's always running at peak performance and is secure.

Your Place, Our Place or the Cloud

Your business needs will determine which parts of your infrastructure you keep inhouse, which you co-locate or host with Corserve, and which deliver the best value when delivered in the cloud. We will first evaluate every element of your IT landscape including servers, storage, network, security, applications and network bandwidth requirements.
